# LYNKS LOCATOR

## High-Accuracy SatCom Transmitter Geolocation

COMMUNICATION & SITUATIONAL AWARENESS

The Safran Data Systems' LYNKS product series is a scalable Spectrum solution for **analyzing satellite traffic** (detection, Situational characterization, geolocation) and the location. It identifies **the origin of a signal appearing on a satellite communication channel**. Typically, this process is used to mitigate interference or locate any transmitters on communication satellites.

The Safran Data Systems off-the-shelf LYNKS LOCATOR product is a fully passive technology to **geolocate uplinking events transmitters with high accuracy**, while simplifying those complex tasks with automatic optimized configurations.

Spectrum  
Situational  
Awareness

Automatic  
geolocation  
on events

Closely coupled  
with LYNKS-  
MONITOR and  
WeTrack.

### FULLY PASSIVE TECHNOLOGY

- Kilometer gde accuracy with direct injection of WeTrack data
- High confidence in the results
- Automatic geolocation of carriers on appearance (even spurious).
- Up to 24 geolocation process in parallel

### ENHANCED FEATURES

- TDMA capable
- Unequaled carrier analysis performance

### POWERFUL FRONT-END

- Four L band inputs
- Up to 220 MHz BW per input
- Up to 48 simultaneous acquisition.

### FULLY COMPLIANT WITH SAFRAN DATA SYSTEMS SERVICE

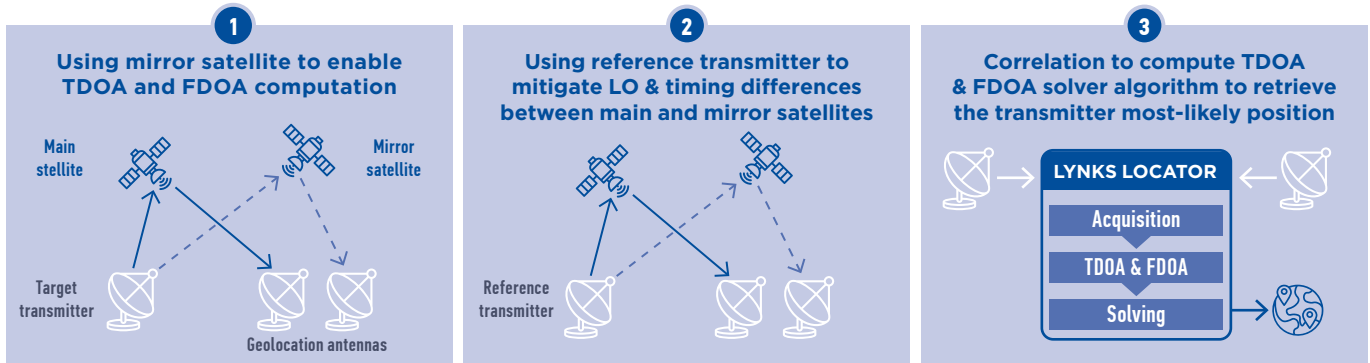

- Plug-and-play connection to ephemeris service
- WeTrack (registered) read

### USER-CENTRIC SOLUTION

- Automatic geolocation configuration
- One click geolocation
- Automated detection and geolocation on carrier appearance
- Scheduled geolocation process
- Full transponder geolocation

# LYNKS LOCATOR

PRELIMINARY

## TECHNICAL SPECIFICATIONS

### General characteristics

<b>Inputs</b> .....	4 inputs
..... Input bandwidth:	950 – 2150 MHz
..... 3dB bandwidth:	220 MHz
..... Nominal input power:	-40 up to 0 dBm
..... (max: +13 dBm) in 1.2 GHz of bandwidth	
..... Input impedance:	50 Ω
..... Noise Factor:	16 dB typical
..... Internal 10 MHz reference, frequency stability:	$< \pm 3.10^{-8} /y$ .
..... Phase noise with internal reference:	
..... @1KHz	$< -85$ dBc/Hz
..... @1MHz	$< -115$ dBc/Hz
..... External 10 MHz reference: level 0 dBm $\pm$ 3 dB, phase noise:	
..... @1KHz, minimum	-85 dBc/Hz
..... @1MHz, minimum	-115 dBc/Hz
..... External 1PPS: Time synchronization,	
..... External 1PPS: LVTTTL (compatible TTL)	
<b>Frequency</b> .....	Range 950 to 2150 MHz (resolution 1Hz)
..... for the center frequency.	
<b>GPS</b> .....	10 MHz reference - 1-PPS signal
<b>Processing</b> .....	Acquisition, analysis, monitoring, recording
<b>Interfaces</b> .....	Ethernet 1 Gbps (RJ45) & 10 Gbps (SFP+)
<b>Output</b> .....	XML RPC API

### Environmental and physical conditions

<b>Temperature</b> .....	Operating: +10°C – +30°C
.....	Storage: -20°C - +70°C
<b>Supply</b> .....	100-240 VAC – 50-60 Hz
<b>Consumption</b> .....	< 1,000 Watts
<b>Dimension</b> .....	2U - 19" rack mountable unit
.....	483 mm x 87 mm x 716 mm (L x W x D)
<b>Weight</b> .....	25 Kg
<b>CE compliant</b> .....	Yes

Find out how our solutions will transform your operations.

Contact sales team to uncover the amazing features of the Lynks product series.

## GEOLOCATION

### Geolocation features

<b>Principle</b> .....	Cross-correlation using two or three satellites
.....	TDOA/FDOA TDOA/TDOA FDOA/FDOA
<b>Reference</b> .....	Use of an existing signal on a compatible transponder
<b>Carrier Cancellation</b> .....	Cancellation of carrier on mirror satellite
<b>Ephemeris</b> .....	Multiple format (TLE, Operators), WeTrack
<b>Recording</b> .....	Synchronized recording of the 4 inputs, based on geolocation parameters
<b>Automatic processing</b> .....	One-Click (automatic configuration for a carrier)
.....	Full transponder geolocation
.....	Trigger on event
<b>Matrix</b> .....	Automatic management of L-band switching matrix

### Geolocation performances

<b>Carrier types</b> .....	Digital modulated signals (SCPC)
.....	Analog modulated signals (SCPC)
.....	Double-Talk
.....	TDMA
.....	Burst type
.....	Spread spectrum
.....	Carrier Under Carrier
.....	Carrier Over Carrier
.....	Carrier Wave
.....	Pulsed Signal
<b>Frequency bands</b> .....	VHF, UHF, L, S, C, X, Ku, Ka bands
<b>Typical satellite separation</b> .....	C-Band: < 16° for a 3 meters target antenna
.....	X-Band: < 15° for a 3 meters target antenna
.....	Ku-Band: < 12° for 2.4 meters target antenna
<b>Processing gain</b> .....	Up to 84 dB
<b>Geolocation accuracy</b> .....	< 10km from best estimated target geolocation to the real position in best conditions with accurate and valid ephemeris.
<b>Geolocation results</b> .....	95% probability ellipse, TDOA and FDOA line, Best estimated target point on a map.
<b>Display &amp; Export</b> .....	Display of all results in a Result Manager. Straightforward exportable and exploitable in excel format. Exportable in KML format.

### GLOBAL SALES

5, Avenue des Andes - CS 90101 - 91978 Courtaboeuf Cedex - FRANCE - Tel.: +33 1 69 82 78 00 - Email: sales.sdsy@safrangroup.com

### USA

3005 Business Park Dr - Norcross, GA 30071 - USA - Tel.: +1 770 753 4017 - Email: sales@SafranDataSystemsUS.com
