Safran Electronics and Defense, Avionics LLC designates **Expeditors** as our preferred broker to make entry for all shipments to the following Safran Electronics and Defense, Avionics LLC delivery locations:

Grand Prairie:
Safran Electronics and Defense, Avionics
2802 Safran Drive
Grand Prairie, TX 75052
United States
IOR ID: 75-2267859-TX

Irvine:
Safran Electronics and Defense, Avionics
1733 Alton Pkwy
Irvine, CA
United States
IOR ID: 75-2267859-CR

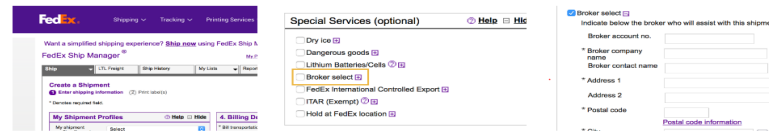

Calexico:
Safran Electronics and Defense, Avionics
1778 Carr Rd, Suite 5B
Calexico, CA 92231
United States
IOR ID: 75-2267859-CC

Broker Details:
Expeditors
506 East Dallas Road, Suite 400
Grapevine, TX 76051
Phone: 817-305-4000

Broker contacts:
group mailbox: seda@expeditors.com
Brianna Erwin: Brianna.Erwin@expeditors.com
Daniel Labra: Daniel.Labra@expeditors.com

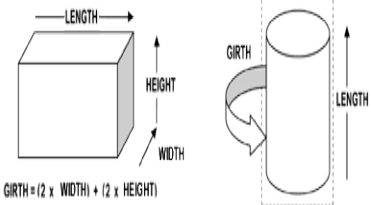

Additional Notes
The above broker contacts should be provided to the carrier at the time the shipment is created to reduce delays and possibility of shipments being returned to sender

How to Choose FedEx International Broker Select in FedEx Ship Manager® at fedex.com

- 1 Using your FedEx account, go to FedEx Ship Manager at fedex.com to create a new shipping label. If you don't currently have a FedEx account, you can sign up online in minutes.
- 2 Go to the Special Services section and simply check Broker Select.
- 3 Fill in your own broker's information.

Weight Definitions and Calculations	
<p>Actual Weight: - The weight of a package using a standard scale rounded to the next full pound / KG. (Example: a 12 1/2 pound carton will have an "actual weight" of 13 pounds).</p>	
<p>Dimensional (Volumetric) Weight: - A calculation used to reflect a package's density. The International Air Transport Association (IATA) volumetric standards is used to determine the dimensional weight. - A calculation used to determine the three-dimensional space the carton occupies: length x width x height measured in cubic inches or cubic centimetres.</p>	
<p>Chargeable Weight: - The chargeable weight of the shipment will be the higher of the volumetric weight or the gross weight.</p>	
<p>How to Calculate Volumetric Weight (International air shipments)</p>	
<p>International Shipments Calculation with Freight Forwarders (Panalpina)</p>	
<p>Imperial (IN / $\frac{\text{Length} \times \text{Width} \times \text{Height}}{139}$ = Cubic Inches 139 (International)</p>	
<p>Metric (CM / $\frac{\text{Length} \times \text{Width} \times \text{Height}}{5000}$ = Cubic Centimetres 5000 (International)</p>	
<p>International Shipments Calculation with DHL Express, TNT Express, and FedEx Express</p>	
<p>Metric (CM / KG) $\frac{\text{Length} \times \text{Width} \times \text{Height}}{5000}$ = Cubic Centimetres 5000 (International)</p>	
<p>Identifying what your chargeable weight will be:</p>	
<p>Example - Imperial Calculation Actual Pallet Weight = 250lbs Pallet Dimensions = 48 x 40 x 50in Pallet Volumetric weight = $(48 \times 40 \times 50) / 139 = 690.65\text{lbs}$ Chargeable Weight of shipment = 690.65lbs</p>	<p>Example - Metric Calculation Actual Pallet Weight = 150kg Pallet Dimensions = 122cm x 102cm x 120cm Pallet Volumetric weight = $(122 \times 102 \times 120) / 5000 = 298.65\text{kg}$ Chargeable Weight of shipment = 298.65kg</p>
<p>How to Calculate Volumetric Weight (USA Domestic air shipments)</p>	
<p>Imperial (IN / $\frac{\text{Length} \times \text{Width} \times \text{Height}}{139}$ = Cubic Inches 139(USA Domestic)</p>	
<p>Example - Imperial Calculation Actual Pallet Weight = 250lbs Pallet Dimensions = 48 x 40 x 50in Pallet Volumetric weight = $(48 \times 40 \times 50) / 139 = 690.65\text{lbs}$ Chargeable Weight of shipment = 690.65lbs</p>	<p>Example - Imperial Calculation Actual Pallet Weight = 700lbs Pallet Dimensions = 48 x 40 x 50in Pallet Volumetric weight = $(48 \times 40 \times 50) / 139 = 690.65\text{lbs}$ Chargeable Weight of shipment = 700lbs</p>
<p>Length or Girth - (For Domestic USA shipments with FedEx, Air and Ground)</p>	
<p>Your Chargeable Weight will be based on the greater between the actual package weight and the Length and Girth of the package.</p>	
<p>Length - is the largest dimension of the carton or object being shipped.</p>	
<p>- For example, if the package is very tall (height is greater than the base) use the height as the length.</p>	
<p>Girth - is the sum of 2 times the width plus 2 times the height or the measurement around the largest area of the cylinder (see illustration).</p>
