

GROUP POLICY

AVIATION SAFETY

Safran is committed to providing reliable products and services with the expected level of safety. This is an essential requirement that demands constant vigilance from all of the Group's employees, since lives depend on it.

This policy helps strengthen our "safety first" culture here at Safran, which relies on everyone's strict adherence to the principles of the safety management system.

AVIATION SAFETY IS OUR HIGHEST PRIORITY.

- Risks are anticipated and managed, and all technical, organizational and human factors are taken into account.
- Problems are investigated, examined and remedied.
- Employees are encouraged to share their information in a trusting environment, supported by a culture of equity and fairness.

WE EMPLOY OUR SAFETY MANAGEMENT SYSTEM IN ALL SAFRAN COMPANIES, ENSURING THAT:

- The appropriate resources are available,
- Aviation Safety is promoted,
- Aviation Safety performance is measured and continually improved,
- All Safran employees understand how their actions affect Aviation Safety.

WE ARE COMMITTED TO STRENGTHENING OUR CULTURE OF AVIATION SAFETY.

The Aviation Safety Policy is brought to the attention of all Group employees, who adopt and enforce it.

Appropriate training is developed and provided at all the relevant levels of responsibility.

OLIVIER ANDRIÈS
Chief Executive Officer
