

PRESS RELEASE

Safran ranks first in Vertical survey for second time

13 July 2022, Tarnos

For the second time, Safran Helicopter Engines has been ranked “top engine manufacturer” by readers of Vertical magazine in its 2022 “Helicopter Engine Manufacturers” survey.

Since 2014, Vertical has evaluated manufacturers on the quality of their services, products and support. The survey is open to anyone in the global civil industry who operates, flies or maintains helicopters or their engines.

Safran Helicopter Engines ranked first in “overall service satisfaction” and in several categories as “support of on-field technical representatives”, “quality of training provided”, “AOG service”, “commitment to product improvement” and “digital services”.

Safran Helicopter Engines CEO Franck Saudo says: “Being ranked first by the Vertical survey is a source pride for our teams worldwide and an encouragement to redouble our efforts to bring our customers the best of the best”.

Safran is an international high-technology group, operating in the aviation (propulsion, equipment and interiors), defense and space markets. Its core purpose is to contribute to a safer, more sustainable world, where air transport is more environmentally friendly, comfortable and accessible. Safran has a global presence, with 76,800 employees and sales of 15.3 billion euros in 2021, and holds, alone or in partnership, world or regional leadership positions in its core markets.

Safran is listed on the Euronext Paris stock exchange and is part of the CAC 40 and Euro Stoxx 50 indices.

Safran Helicopter Engines is the world’s leading manufacturer of helicopter engines, with more than 75,000 produced since being founded. It offers the widest range of helicopter turboshafts in the world and has more than 2,500 customers in 155 countries.
