What Are “C-” or “Q-”

- **“C-” : Certification:**
  - This stage is granted to the supplier’s site who successfully implemented a system or a capability (Non-Special Processes) and proves its compliance to certain set of MBD and/or SAFRAN requirements (generally by an audit performed by MBD/SAFRAN). As an example is the Model Based Definition certificate, Delegations certificate or Certificate for Machining of Aluminum.
  - Certification is not necessarily linked to a “re-certification period”

- **“Q-” Qualification:**
  - This is the recognition of the supplier’s site capability to perform a “Special Process” on products, meeting the MBD requirements as defined in technical specification.
  - Qualification is linked to a “re-qualification period” of 3 years.
