

## **L PRESS RELEASE**

### **Morpho Detection's CTX 9800 achieves ECAC Standard 3 endorsement at 0.5 meters per second**

Safran Identity & Security, through its subsidiary Morpho Detection, announced its CTX 9800 DSi™ explosives detection system (EDS) has achieved Standard 3 endorsement from the European Civil Aviation Conference (ECAC) with a 0.5 meters per second belt speed.

While maintaining the same footprint and ease of serviceability, CTX 9800 at 0.5 m/sec belt speed reduces power consumption while improving uptime, image archiving capability and total bags per hour (BPH) capacity. Leveraging increased speed and the crisp image quality of the Clarity Data Acquisition System (DAS), CTX 9800 now reliably screens up to 1,800 BPH. Combined with the compact CTX 5800 and unmatched global service footprint, Morpho Detection helps all-sized airports ensure compliance with approaching mandates requiring ECAC Standard 3-approved hold baggage screening capabilities.

Developing the ability to screen hold baggage faster, more effectively and with superior image quality is at the heart of Morpho Detection's commitment to our customers for more than 25 years. This approval from ECAC gives airports powerful new security capabilities while further validating the CTX platform as having the scalability to meet the rapidly growing role airports are playing as global hubs for commerce.

Moureen Schobert, CTX Product Manager, Morpho Detection

Powered by leading-edge Computed Tomography (CT) technology, Morpho Detection's CTX family of EDS are currently in-service around the world.

### **About Morpho Detection**

*In an increasingly dangerous world, there's no time for downtime. For the past 25 years, authorities across the world have trusted Morpho Detection's deep expertise to design and implement leading-edge detection solutions. Recognized for delivering unparalleled service quality, our global network of expert engineers and technicians provide comprehensive support for every phase of your investment. We're committed to delivering the most effective detection technology, helping security specialists concentrate on what matters most: protecting the public. Discover more about our range of solutions by visiting [morphodetection.com](http://morphodetection.com).*

*Follow Morpho Detection on LinkedIn and on Twitter @MorphoDetection*

*Morpho Detection is part of Safran Identity & Security, a security business of the Safran group (PAR: SAF).*

**Safran** is a leading international high-technology group with three core businesses: Aerospace (propulsion and equipment), Defence and Security. Operating worldwide, the Group has 70,000 employees and generated sales of 17.4 billion euros in 2015. Safran is listed on Euronext Paris and is part of the CAC40 index, as well as the Euro Stoxx 50 European index.

**Safran Identity & Security** is a global leader in identity and security solutions, deploying systems in more than 100 countries. Backed by more than 40 years of experience in biometrics, the company develops innovative technologies for the public and private sectors, including identity management, secure transactions and public security solutions.
