

PRESS RELEASE

Safran Aerosystems' oxygen systems taking flight on Airbus' H145 helicopters

Safran Aerosystems Services received an order from Airbus Helicopters to provide Ecuadorian Air Force's H145 helicopters with oxygen systems

Those oxygen systems, developed by Safran Aerosystems, are designed for the pilot, the co-pilot and passengers and will be used during high-altitude flights.

This development is the result of a common work within Safran Aerosystems involving Services and Oxygen Systems in Europe and in the US, despite the context of the sanitary crisis.

This new order enables Safran Aerosystems to broaden and diversify its product offerings for helicopter market. This also provides ever better support for helicopter operators in their operations.

Safran Aerosystems Services delivered the first sets, and the following ones are scheduled to be delivered in the next months.

***Safran** is an international high-technology group, operating in the aviation (propulsion, equipment and interiors), defense and space markets. Its core purpose is to contribute to a safer, more sustainable world, where air transport is more environmentally friendly, comfortable and accessible. Safran has a global presence, with 79,000 employees and sales of 16.5 billion euros in 2020 and holds, alone or in partnership, world or regional leadership positions in its core markets. Safran is listed on the Euronext Paris stock exchange and is part of the CAC 40 and Euro Stoxx 50 indices.*

***Safran Aerosystems** is a world leader in evacuation slides and oxygen systems. The company is a major player in aeronautical safety systems and fluid systems for airplanes and helicopters.*
