

L PRESS RELEASE**Safran wins the electrical wiring contract for Airbus Helicopters H160**

Safran Electrical & Power has been selected by Airbus Helicopters to supply the electrical wiring for the H160, a new generation mid-range helicopter. With this new contract, Safran Electrical & Power is expanding its involvement in this program as it was already in charge of the cockpit avionics bay and the rear avionics bay of the aircraft.

"We look forward to continuing our collaboration with Airbus Helicopters on the H160, for which we were already supplying the cockpit avionics and the rear avionics bays. This is a testament to our client's confidence and the extra value we have brought to the program. We currently produce electrical systems and wiring for most Airbus Helicopters programs: Super Puma, Puma, Dauphin, NH90, H145 and H160," said Julien Willer, Key Account Manager Interconnection Systems Eurasia, Safran Electrical & Power.

"Safran was selected following a rigorous call for tenders. Here at Airbus Helicopters, our high standards in terms of quality, safety and competitiveness are decisive criteria. By winning this call for tenders for the electrical wiring on the H160, Safran has demonstrated its commitment to continuing our partnership, which began many years ago, on other Airbus Helicopter programs. These shared values mean that we are especially delighted with this latest partnership," said Thierry Vinson, Head of Commodity Lead Buyer Electrical Systems and Components, Procurement, Airbus Helicopters.

Visit the Safran stand at the Paris Air Show, from June 17 to 23, 2019: Hall 2A – Stand No. 253

Safran is an international high-technology group, operating in the aircraft propulsion and equipment, space and defense markets. Safran has a global presence, with more than 92,000 employees and sales of 21 billion euros in 2018. Safran is listed on the Euronext Paris stock exchange, and is part of the CAC 40 and Euro Stoxx 50 indices.

Safran Electrical & Power is one of the world's leaders in aircraft electrical systems. The company is a key player in the equipment electrification of electric and hybrid propulsion sector. It has 12,400 employees across 12 different countries.
