Vietnam Airlines chooses Messier-Bugatti-Dowty to provide landing gear maintenance for A321 fleet

MRO Americas, Dallas, April 7th, 2016 - Messier-Bugatti-Dowty (Safran) has been chosen by Vietnam Airlines to provide landing gear overhaul services for their A321 jets in a three-year contract covering nine aircraft.

Messier-Bugatti-Dowty's MRO (maintenance, repair and overhaul) facility in Singapore will provide overhaul services for Vietnam Airlines' A321 landing gears.

The airline had already selected Messier-Bugatti-Dowty in 2012 to provide landing gear maintenance services on eight Boeing 777s, then in 2014 for five A321s.

According to Vincent Mascré, Chief Executive Officer of Messier-Bugatti-Dowty, *"This latest contract consolidates our long-standing partnership with Vietnam Airlines and reflects our sustained commitment to delivering the highest and competitive level of services, quality and performance expected by our customers."*

Messier-Bugatti-Dowty's MRO division offers an unrivaled slate of customer support services, including landing gear overhauls, through an international network of seven service centers in Europe, Asia and the Americas. The network can call on a large stock of ready-to-use replacement landing gear worldwide. Messier-Bugatti-Dowty has earned international certifications from all aviation authorities and aircraft manufacturers for a complete range of repair procedures covering equipment from not only Messier-Bugatti-Dowty, but also other manufacturers.
