LE BOURGET, France — 18 June 2019 — CFM International has finalized an order with Macquarie Airfinance Group Limited, a wholly owned subsidiary of Macquarie Group Limited, for LEAP-1A engines.

We are pleased to expand our great relationship with Macquarie to now include our advanced LEAP engine. We believe their airline customers will begin to reap the benefits of our advanced technology immediately.

Gaël Méheust, president and CEO of CFM International

The LEAP-1A engine is providing operators with a 15 percent improvement in fuel consumption and CO2 emissions, along with dramatic reductions in engine noise and exhaust gaseous emissions. All this technology is focused on providing better utilization, including CFM’s legendary reliability out of the box; greater asset availability; enhanced time on wing margins to help keep maintenance costs low; and minimized maintenance actions, all supported by sophisticated analytics that enable CFM to provide tailored, predictive maintenance over the life of the product.

Safran is an international high-technology group and tier-1 supplier of systems and equipment in the Aerospace and Defense markets. Operating worldwide, Safran has nearly 58,000 employees and generated sales of 15.8 billion euros in 2016. Working alone or in partnership, Safran holds world or European leadership positions in its core markets. Safran undertakes Research & Development programs to meet fast-changing market requirements, with total R&D expenditures of 1.7 billion euros in 2016. Safran is listed on the Euronext Paris stock exchange, and its share is part of the CAC 40 and Euro Stoxx 50 indices.

Safran Aircraft Engines designs, produces, sells, alone or in partnership, commercial and military aircraft engines offering world-class performance, reliability and environmental-friendliness. Through CFM International*, Safran Aircraft Engines is the world’s leading supplier of engines for short and medium-haul commercial jets.

*CFM is a 50/50 joint company between Safran Aircraft Engines and GE
