Safran Passenger Innovations

Jim Snover  
Senior Vice President  
Quality and Facilities

Dear Noleen Campbell,

Safran Passenger Innovations (SPI) is fully aware of the importance of the European REACH regulation and is committed to meeting its obligations as a potential provider of articles covered by Article 33<sup>1</sup> of the regulation.

SPI is working with our suppliers to ensure that they inform us of the presence of unauthorized candidate list substances in the articles they supply to us.

SPI would like to inform you that, as a result of our processes, SPI does not knowingly supply you with any article containing more than 0.1% by weight of any substance included in the REACH candidate list available at this date.

I'm your point of contact for REACH and will be available to discuss our process with you and provide you with any relevant information.

Safran group companies are combining their efforts and putting their expertise at your disposal as part of meeting your needs of complying with the requirements of REACH. We are committed to working with our supplier base to continually comply with the REACH regulations.

Best Regards,

Jim Snover  
Senior Vice President
