

February 10th, 2022

Subject : Update on transfer to Safran Electronics & Defense of Actuators and lighting systems (cage codes F0214, F0358, 05617) aftermarket support activities from 1st January 2022.

Dear Valued Customer,

As per previous communications released, **the transfer to Safran Electronics & Defense entities ("SED")** of the Actuators and lighting systems aftersales activities previously performed by Safran Aerosystems Services (SAS), has been effective since January 1st, 2022.

We are grateful to the many of you who updated your vendor system in order to address your future purchase and repair orders to the associated Safran Electronics & Defense entities as detailed below:

- SAFRAN Electronics & Defense Cockpit Solutions (for cage code F0214)
- SAFRAN Electronics & Defense Actuation (for cage code F0358)
- SAFRAN Electronics & Defense Avionics USA (for cage code 05617)

For the few Customers that have required more time to update their system accordingly, in order to ensure a smooth transition, SED and SAS have carried on processing your urgent spare purchased orders as received. However we would like to remind you:

- **Beyond 28th February 2022**, such flexibility will stop and only Purchase Orders directed to the right SED entities will be processed. **This include the spare orders sent through EDI** (e.g. AEROXCHANGE, MRO TRACKER, AIR-SUPPLY, EXOSTAR, SPEC2000)
- All Orders should now all be directed to **the Safran Electronics & Defense entities as detailed in Service Information letter (SIL) attached.**
- **From April 1st, 2022**, all existing Orders already accepted by SAS remaining opened (if any) will have to be modified to get directed to and performed by the corresponding SED entities.

The **Service Information letter (SIL) attached** provides the details required for your company to establish SED entities as suppliers: address, banking details, contact details. Should you have any questions, please do not hesitate to contact your dedicated account manager.

Very truly yours,

Thierry LASBLEIS
Vice President Customer Services
SAFRAN Electronics & Defense
