## Airbus, Air France, Safran, Suez and Total welcome advancements in favour of a sustainable aviation biofuel industry in France

Toulouse – France, Monday 27 January 2020

As the French Government presented the country's ambitions with regards to sustainable aviation fuel, in Toulouse, Airbus, Air France, Safran, Suez and Total acknowledge the launch of a new Call for Expression of Interest (CEI). The ambition presented set forth the conclusions of a working group which included government agencies and industrial partners, all of whom signed the Green Deal<sup>1</sup> in December 2017.

This CEI is a fundamental first step towards the emergence of a sustainable aviation fuel industry in France. It will allow investment projects in second generation sustainable aviation fuel production units in France to be identified, **as well as supportive measures and incentives in favour of such investments.**

**The implementation of an economically viable and lasting industry is key for accelerating the use of sustainable aviation fuel** and for reducing net CO<sub>2</sub> emissions in air transport. Guaranteeing that all players maintain a competitive edge in a competitive environment and helping to lead the world forward.

For 18 months, industrial entities have been mobilised and are working alongside the government to promote the emergence of a sustainable aviation fuel industry in France. The initiative constitutes the first innovative partnership between public and private players in the industry. It sets forth the conditions for developing lasting industries in France in the following set of recommendations:

- Mobilise the necessary volume of raw materials for the aviation sector,
- Ensure that sustainable resources, especially sustainable resources sourced from the circular economy, are used to produce advanced sustainable aviation fuel,
- Ensure that the industry is economically viable for all actors in the value chain through appropriate incentive schemes,
- Use existing airport logistics distribution networks,
- Support and promote production diversification.

The expansion of sustainable aviation fuel constitutes a strategic lever for reducing net CO<sub>2</sub> emissions from air transport over a full lifecycle by up to 80% before blend.

## About Air France

Air France, airline of French inspiration, with high standards and a caring attitude, turns the flight into a moment of real pleasure on all its daily operations in France, Europe and worldwide.

Air France-KLM is the leading Group in terms of international traffic on departure from Europe. It offers its customers access to a network covering 312 destinations in 116 countries thanks to Air France, KLM Royal Dutch Airlines and Transavia. With a fleet of 554 aircraft and 104 million passengers carried in 2019, Air France-KLM operates up to 2,300 daily flights, mainly from its hubs at Paris-Charles de Gaulle and Amsterdam-Schiphol.

Its Flying Blue loyalty program is one of the leaders in Europe with over 15 million members.

Together with its partners Delta Air Lines and Alitalia, Air France and KLM operates the largest transatlantic joint venture with more than 275 daily flights.

The group also offers cargo transport and aeronautical maintenance solutions.

Air France and KLM are also members of the SkyTeam alliance which has 19 member airlines, offering customers access to a global network of over 14,500 daily flights to more than 1,150 destinations in more than 175 countries.
